

A traditional Chinese living room featuring large wall murals of peonies, birds, and butterflies. The room includes a wooden door, a sofa with red patterned cushions, a dark wood cabinet, and a white lamp. The murals are framed in dark wood and set against a gold background. The overall style is a blend of traditional Chinese aesthetics and modern interior design.

Dynasty Peonies  
Modern Chinois

Oversized blooms spill across every panel in a riot of colour that pushes — deliberately — just past the point of polite decoration. The design carries two references simultaneously: the classical Chinese language of the peony, symbolising wealth, prosperity and honour, and the unapologetic glamour of 1980s couture.

This is maximalism handled with precision. Scale and colour are pushed to the edge where indulgence tips into something genuinely intoxicating.

*"It's taken me thirty years to resolve what I encountered in China in the 1990s — flowers painted too large, greens a little too turquoise, design that felt unruly. They weren't wrong. We just weren't ready. Dynasty Peonies is the return to that."*

## Bespoke Tailoring

For the most considered result, we recommend our Tailoring service. The design is adapted to your space — factoring in layout, key features, and complex areas such as staircases — to ensure a cohesive, intentional installation. Service fees apply.

## Standard Run

Available at set heights, the Standard Run is ideal if you need to move quickly into production. It offers the same artistry and craftsmanship as a tailored order but without spatial or compositional adjustments, resulting in a more general fit in challenging spaces.

## Customisation

Many of our designs can be customised to suit your palette and preferences. As customisation involves design development, customised orders are completed through our Bespoke Tailoring service and cannot be offered as a Standard Run.

## Embroidery

We do not recommend heavy embroidery for Standard Run orders, as embroidered sections may need to be trimmed during installation, which may lead to fraying.
