Buckskin P015

The hand-varnished finish to the Buckskin paper ground is similar to a rare wood veneer, fine leather or parchment. Layers of colour are gradually built-up, creating a sense of lustre and luminosity with each colourway forming its own identity.

Colour

Buckskin is presented in 22 standard colourways and used alone creates a layered and rich tone to any room. Further, it can become a background one of our hand-painted designs.

Dimensions

Buckskin is provided in 3.2m panels. Custom lengths are available upon request.

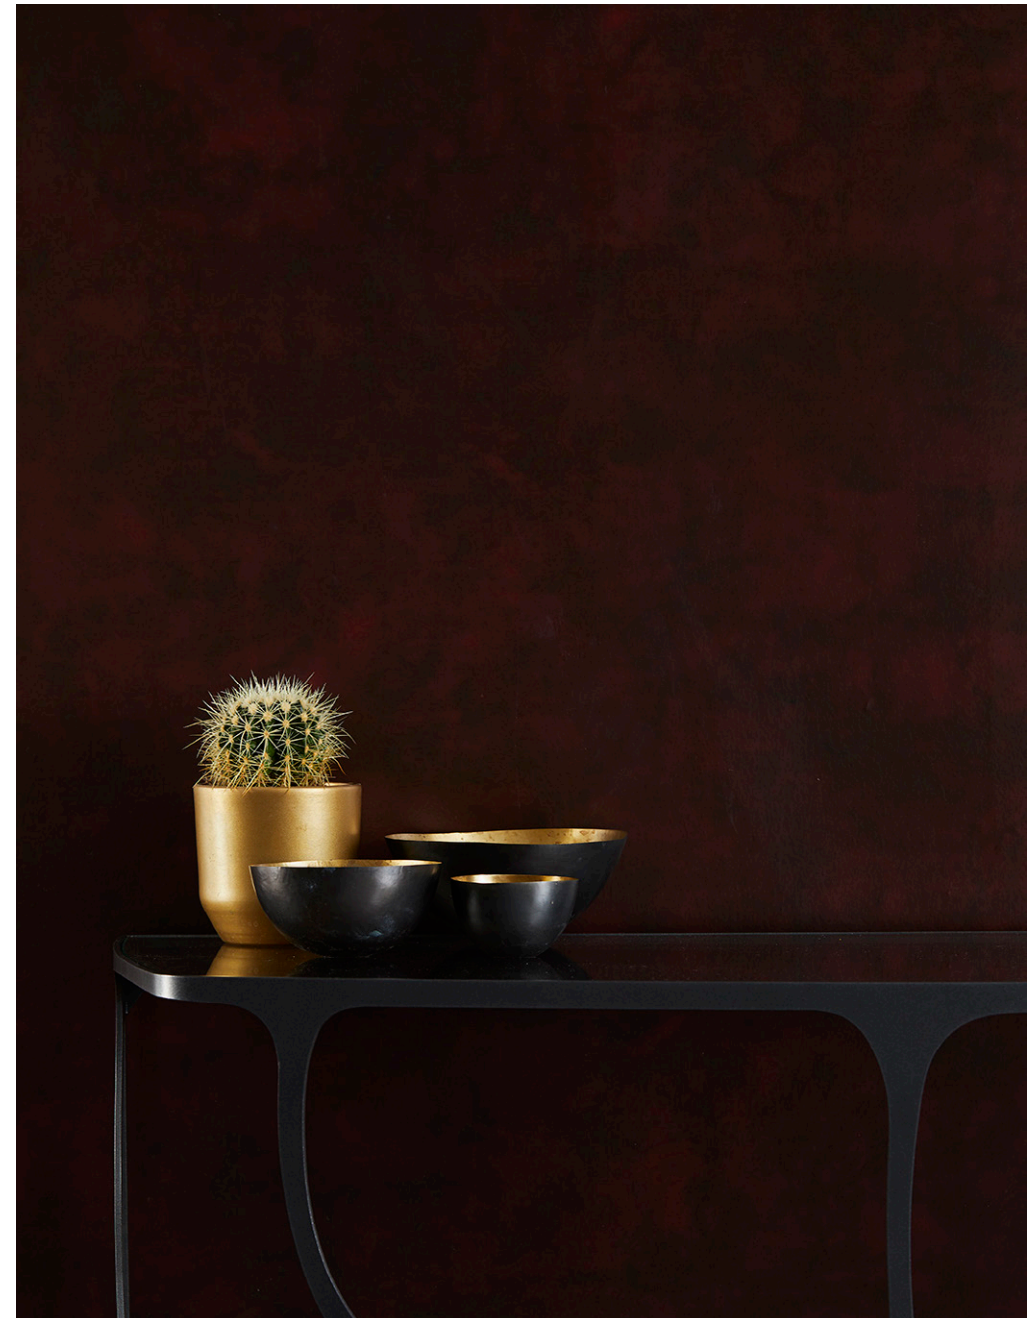

Usable width is 915mm/36" plus trim.

Technical:

Backing is a non-woven base material. Both sides of the material require hand-trimming before installation.
